

# Storage Shelving

**Trimet Storage Solutions** has the most complete and adjustable shelving range available. The flexibility of our systems ensures they are able to grow as your business grows.

The boltless shelving design is quick and easy to install without specialized tools or compromising durability or design flexibility. The Shelving system is fully customizable to any width, depth and height. Bays can be added on, removed or adjusted.

These shelves that are specifically designed for hand loading, help in organizing the **parts room**, **stock room**, **tools room**, and **inventory area**.

Engineered for strength and versatility, our shelving systems are ideal for warehouses, manufacturing facilities, and retail environments. Designed to handle heavy loads and customized to fit your space, they deliver long-term performance with a clean, functional design.

## Shelving for Industries

Durable, high-capacity shelving for warehouses, factories, and retail spaces—customized to fit your needs and built to last.

## Mobile Shelving

High density Mobile storage is suitable for any short spaced retail, office, professional, warehouse, and healthcare area. Mobile shelving increases storage space by a minimum of 40%.

## Shelving for Retail Stores

Our retail shelving systems maximize overall floor space while showcasing and merchandising products.

## Multi-Tier Catwalk Shelving

These shelves are installed from the floor to the ceiling with several catwalk floor in the middle. The entire system is custom engineered to specific space, height, functionality, and load requirements.
